

Juan Rosas

Full-stack junior developer

ABOUT ME

Junior full-stack developer specialized in the MEVN stack, proactive with assertive communication skills and adaptability to change. Experience in the design and creation of scalable APIs and friendly interfaces, as well as in database management. I am motivated to work in international teams driving innovative projects that generate value and scalable results.

SOFT SKILLS

- Teamwork
- Empathy
- Effective communication
- Emotional intelligence
- Problem solving

LANGUAGES

- English - Advanced
- French - Begginer
- Spanish - Native

EXPERIENCE

CineCampuslands

Campuslands - 2024

I developed a web application in Vue.js with APIs in Node.js and Express to manage movie selection, ticket purchase and seat allocation. I implemented movie filtering, VIP discounts and user and role management in MongoDB, creating an attractive and efficient user experience.

EcommerceAmazon

Campuslands - 2024

I developed an interactive Ecommerce with HTML, CSS and JavaScript, integrated with Amazon's API. It allows users to search and select products intuitively, with features such as Wishlist, shopping section and a dynamic home page that enhances the user experience.

EDUCATION

Campuslands

Intensive developer training center
2023 - 2024

Advanced English C1 Level

Smart Academy
2023

HARD SKILLS

- MEVN stack (MongpDB, Express.js, Vue.js and Node.js)
- Databases SQL NOSQL
